

Technical Specs:

Main MCU: RP2040 (Raspberry Pi)

Storage: 8MB

Powering Options: USB-C, DC Power input jack

Operating Voltage:

- 1) Main MCU: 3.3V
- 2) USB C power: 5V
- 3) External DC Power Input: 6-12V

Board Size:

L: 75mm

W: 55mm

H: 15mm (at maximum height) ,5mm PCB

Wireless Modules:

(No wireless modules)

WiFi: NO

BLE/Bluetooth: NO

USB Speeds: USB 2.0

Fundamental parts Used:

- 1) RP2040 – Raspberry Pi
- 2) W25Q32JVSSIQ-WinBond
- 3) AMS1117-3.3-Advanced Monolithic Systems
- 4) AMS1117-5V Advanced Monolithic Systems
- 5) WS2182- WorldSemi
- 6) SM712-SMC Diode Solutions
- 7) Passives TyoHM
- 8) SM04B-SRSS-TB(LF)(SN) - JST
- 9) [TS-1187A-B-A-B](#) – XKB Connection
- 10) MC 307- Hanbo Electronic

Country of Manufacture: India

Design and Assembly: India

Solder: Lead Free

Any Tests Performed: None

Product photos:

PICUNO

Powered By RP2040

It's ON
